# Phase 1 Report

Weishu Cheng

A20375113

Below is the first screenshot. It appears like this because at the first time I created a pull request, I merge it to the original branch at once before I saw that I am supposed to wait until TA has merged the pull request. So I reverted it and created another pull request to add my account name in w.jave and waited it to be merged.

Below is the second screenshot.
